COMMERCIAL SATELLITE OR ANTENNA PERMIT

Antennas, including satellite dishes are regulated by the following codes and require building permits with full construction documents showing the following:

1) Codes:

New York State Code Sections 1606, 1607, 1608 and 1609 for live, dead, wind and snow loads acting on the antenna/dish and New York State Fire Code Sections 507.3 and 507.4 for fire safety safeguards. Town of Islip Zoning Codes under Section 68-420.1 for wind design and special permit requirements.

2) Locations:

Ground mounted - No permit is required.

Building mounted - provide roof plans and elevations showing location of antenna/dish and associated equipment. Site plan will also be required.

3) Construction documents:

- Building mounted - show plans and elevations of antenna/dish indicating heights, location and how attached to the building. Also, a New York State licensed engineer or architect shall certify that the existing building structure can sustain the new imposed loads, or shall provide structural drawings for new support. Certify antenna attachment will resist all wind loads.
- Any manufacturer literature shall be provided.
- All construction documents shall be signed and sealed by a New York State licensed architect or engineer.
